Enteral Feeding Set Products

March 2004 (3)

Gravity-flow enteral tube-feeding sets are available for patients who need to continue their home management plan to provide nutrition via a feeding tube.

The preferred method of enteral feeding for most in-hospital patients remains to be via the Kangaroo Enteral Feeding Pump using feeding sets that have an anti-flow valve. **SETS WITH ANTI-FLOW VALVES CANNOT BE USED TO PROVIDE GRAVITY-FLOW FEEDING.**

Gravity-Flow Enteral Tube-Feeding Pump Set
Nonsterile, DEHP-Free, Tubing with Roller Clamp
below Drip Chamber.

Item ID#: 02928; Unit of Issue: Each
